

Jira integration:

Click connect jira button.

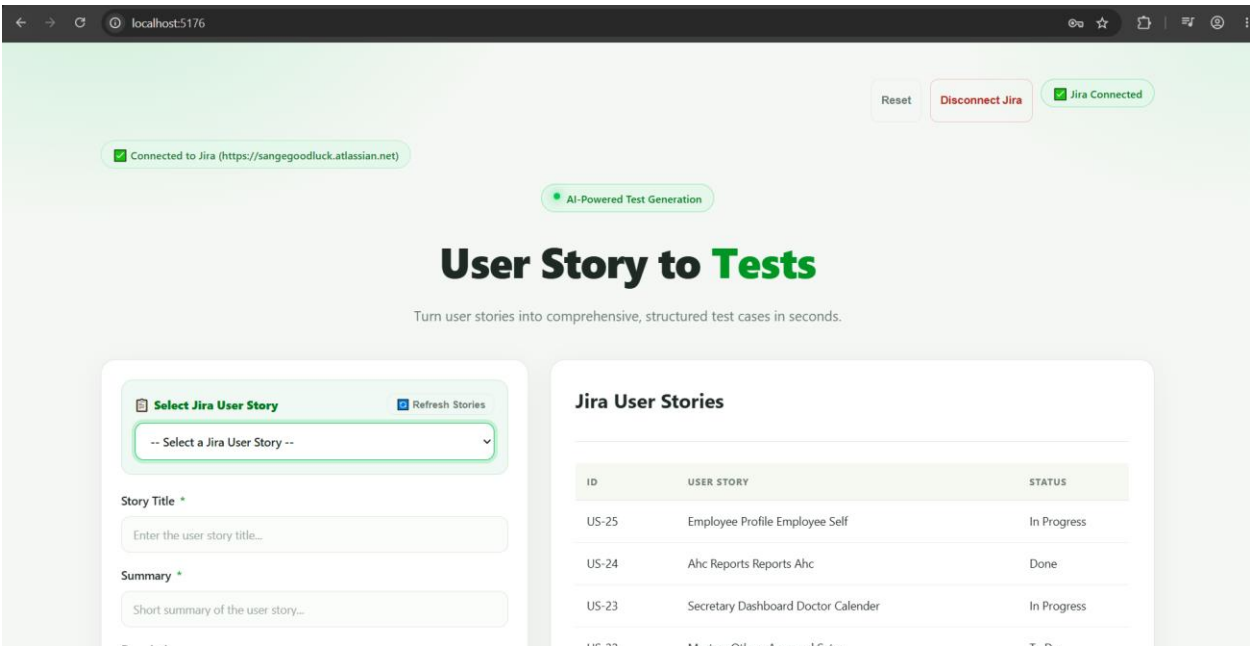

The screenshot shows a web browser at localhost:5176 displaying the 'User Story to Tests' application. The interface has a light green theme. At the top right, there are 'Reset' and 'Connect Jira' buttons. Below the header, a green badge says 'AI-Powered Test Generation'. The main heading is 'User Story to Tests' in bold green, followed by the subtitle 'Turn user stories into comprehensive, structured test cases in seconds.' On the left, there is a form with four sections: 'Story Title *' with a text input, 'Summary *' with a text input, 'Description' with a larger text area, and 'Acceptance Criteria *' with a text input. On the right, a large box contains a test tube icon and the text 'Your test cases will appear here'. Below this, it says 'Fill in the story details on the left and hit Generate. We'll craft positive, negative, edge, and more test cases for you.' At the bottom of this box are four buttons: 'Positive', 'Negative', 'Edge', and 'Authorization'.

Enter all the required details and click connect jira button.

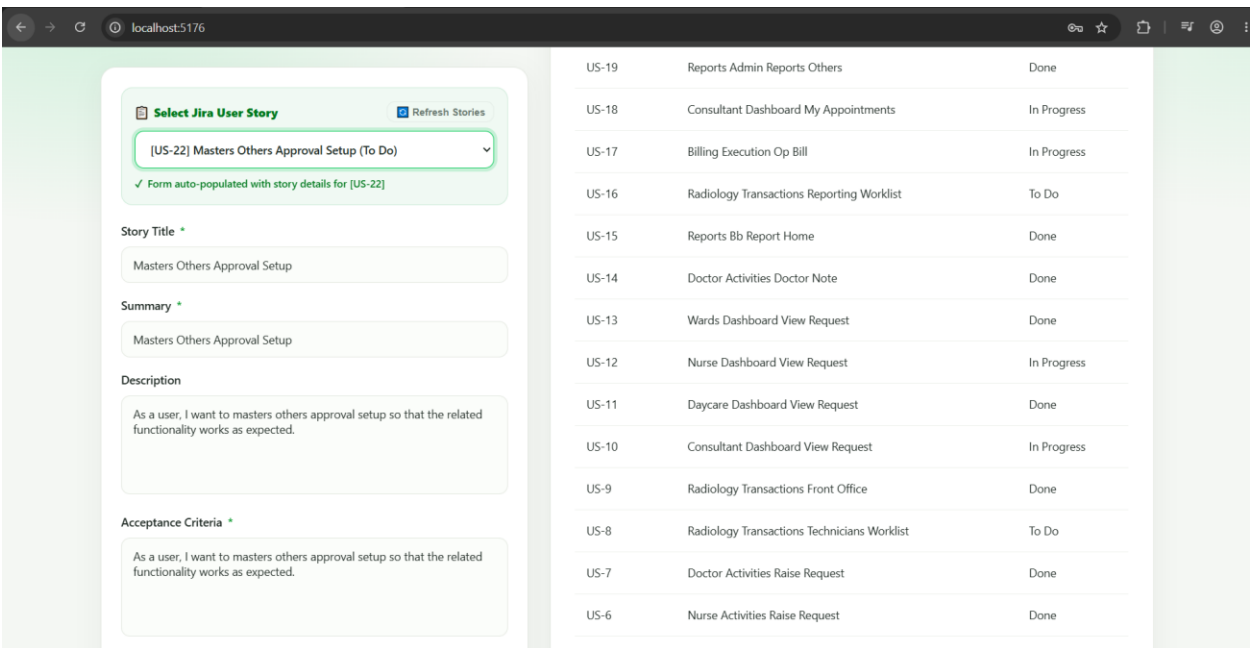

The screenshot shows a modal dialog titled 'Connect to Jira' with a close button (X) in the top right corner. The dialog contains the following fields: 'Jira Base URL *' with the value 'https://sangegoodluckatlassian.net', 'Email ID *' with the value 'sange.goodluck@gmail.com', and 'API Key / Password *' with a masked input. Below the fields, there is a link: 'For Jira Cloud, generate an API token at id.atlassian.com'. At the bottom of the dialog are two buttons: 'Cancel' and 'Connect Jira'.

Connection established as expected and fetched the user stories from jira.

When I select the user story from dropdown. It filled the required details of the testcase.

After clicking the generate TestCases button, I could see the testcase generated as expected
